\$ 42.00 each + freight if applicable.

Model 1660. LED Bow Navigation Light Bi-Colour 110mm, 80mm lever super suction base. Weight 140 grams without batteries.  
\$ 42.00 each + freight if applicable.

**Product description models 1650/51:** Compact extra bright 8 LED (US Coast Guard certified for 2 nautical miles – 3,706 metres) white 360 degree navigation light of water resistant ABS construction with rubber seals (floats). **Requires 3x AAA size batteries (+34 grams).** Endurance approximately 30 hours on long life alkaline type batteries.

**Product description model 1660:** Bright bi-colour navigation light with 4 LEDs per sector (green & red) & 225 degree illumination field.

Water resistant ABS construction with rubber seals (floats). **Requires 3x AAA size batteries (+34 grams).**

It is very easy to lengthen the clamp/screw LED navigation light (1650) mast to over one metre. Purchase a poly irrigation rural riser pipe 20mmx900mm (M&M PE2036) from Bunnings Warehouse gardening section (\$6.67). Cut the existing mast into two equal lengths & clean up the edges of the cut with a file. Insert the old mast sections into the irrigation pipe (good tight fit) to the desired length say 1100 to 1200mm above the clamp. The irrigation pipe can be drilled and screwed or pop riveted to the mast if desired.

Order form on overleaf :-
