

NSW UNION OF ROWERS INC.

MERCHANDISING PROGRAMME

NATURAL, SUPERIOR STRENGTH & SAFE.

**SKOOT**  
INSECTICIDE AND INSECT REPELLENT

AUSTRALIAN MADE & OWNED

**Pyrethrum based protection against flying insects**

**Features: DEET FREE!**

Skoot can be used both as an insect repellent or insecticide. Simply spray exposed skin avoiding the face. To apply to the face, first spray on hands, and then wipe onto face, avoiding the eyes. Alternatively can also be sprayed at uppercorners of room or directly at an insect.

Compact size - Skoot can be taken anywhere: the beach, in the garden, fishing, camping, sports, B.B.Q's and around the home. It is designed to fit into your pocket or purse for easy and immediate use against flying insects.

400 individual metred sprays per can. Each spray delivers a minimum of 50mg of high load actives. Skoot is great value for money.

Skoot contains Pyrethrins and other natural ingredients making it suitable for the whole family including young children and around your pets. Skoot is perfume free eliminating any perceived allergies to fragrance.

Skoot has a leak proof locking valve in the cap which is clamped to the can; this concept prevents it leaking in the pocket, purse or sports bag.

Skoot has been especially formulated as a dry spray. Application to the skin is comfortable and non-greasy.

Skoot is suitable for all forms of travel, land sea, and air especially to tropical destinations where holidays can be ruined by insects carrying unwanted diseases.
